Cumberland, MD

February 22, 2026

Dear Hiring Manager,

I am currently a senior at Frostburg State University, graduating in Spring 2026 with a Bachelor of Science in Computer Science. My experience comes from academic and project-based software development.

Through my time in college and my internship, I have developed skills in Java, Python, PHP, JavaScript, and SQL. I also have experience with tools such as Docker, Nginx, Multipass, and Git. Much of my work has focused on web applications, especially with my internship at Willetts Technology, where I work on new development and maintain their electronic health record software.

I am interested in continuing to develop my software development skills while also collaborating with other developers. I value experience working on new codebases and in a professional environment.

I appreciate you taking the time to review my work and background. I would welcome the opportunity to discuss my experience and projects further with you.

Sincerely,

Bryce Pannone
